# Unzipping a resource

The following instructions demonstrate unzipping a zipped resource on a Windows PC.

Note: Mac OS automatically unzips the resource upon download.

To extract the files

1. **Right click** on the file you just downloaded.
2. Select '**Extract All...**' from the drop-down menu that appears.

3. Click the **Browse** button and choose a location to save the files on your PC.
4. **Check** the box next to 'Show extracted files when complete'.
5. Click **Extract**

The files will be extracted to your PC.
Once extracted, a new window will open containing a folder with the same name as the zipped file.
Select and open the '**files**' folder to locate the extracted files.
